## (54) PORTABLE RADIO COMMUNICATION EQUIPMENT

## (57)Abstract:

**PROBLEM TO BE SOLVED:** To control supply of power to a display section without increasing a load of a CPU by stopping supply of power to the display section in the case that no incoming call comes or no key entry is made for a 1st time from application of power and repeating supply/stop of power to/from the display section for a 2nd time interval after the stop for the 1st time.

**SOLUTION:** A timer 11 opens a switch 12 after the lapse of a 1st predetermined time T from the start of time count. No power is supplied to an LCD drive section 7 to turn off an LCD 8. The timer 11 continues time count processing even after open control of the switch 12.

That is, the timer counts time till a time 2T elapses, and in the case of the arrival of an incoming call or entry of a key between the time T and the time 2T, the timer 11 controls a switch 13 to select a 2nd terminal from a 1st input terminal so as to connect a power supply 10 to the LCD drive section 7 via the switch 13. The timer 11 closes the switch 12 after the lapse of the time 2T to supply power to the LCD drive section 7 thereby activating the LCD 8 and resetting the counter.
